

Supplier Capabilities Spotlight

FoodTools, Inc.

Quality Cheese Cutting Equipment for over 30 Years

5CWS cheese scoring machine

The FoodTools 5CWS cheese scoring machine is designed to cut a groove on the outside of hard cheese wheels to facilitate horizontal cutting with a wire so slabs can be portioned for exact weight. The machine features a dial where the product is placed, an electric motor to rotate the product, a stainless steel pneumatic motor to rotate the blade, adjustable height for cutting blade, and stainless steel construction for sanitation requirements.

5-HA horizontal cheese cutting machine

The 5-HA is a heavy duty hydraulic powered wire cutter that is designed to cut hard cheese wheels horizontally. It can be fitted for 1-4 slabs that have been scored by

the 5CWS scoring machine. The machine is hydraulic / pneumatic and is controlled by a PLC. The machine has stainless steel construction with light curtain for operator safety requirement.

CS-3SA wheel & block cutter

The CS-3SA EWC is an exact weight cutter designed for semi-hard & hard cheeses. It features a stainless steel blade which is highly sharpened, servo driven platform and product dial with a pneumatically driven blade. The machine is PLC con-

trolled, features a light curtain for operator safety and is constructed of stainless steel for complete wash down. An optional scale can be provided to weigh each product for exact weight requirements.
