

Supplier Capabilities Spotlight

Powder Process-Solutions

At Powder Process-Solutions, we engineer powder processing solutions to meet the unique challenges encountered within the dry food processing, nutritional processing and dairy processing industries. The diversity within our product lines enables us to meet your needs by selecting the best solution from a wide range of system options. All products undergo rigorous quality control checks and are manufactured to the highest standards.

PPS brings together innovative technologies and expertise to provide quality, cost-effective products and services to the sanitary powder handling industry. PPS is your single source for custom powder handling solutions, including systems and components for:

- Pneumatic & Mechanical Conveying
- Unloading & Storage
- Batching, Blending, Milling, Sifting
- Dust Collection & Vacuum Cleaning
- 25kg Bag Filling & Bulk Bag Filling
- Consumer Packaging
- Installation Supervision
- Process System Audits

Our system solutions come from 40 years of experience and expertise within the industry of dry powder and material handling.
