Complementing our family of PMO Mixproof valves, Tuchenhagen Flow components also offers a full range of sanitary valves, components and application support services for the entire Dairy plant :

PRODUCTS :

Shut-Off / Divert / Long-Stroke / Angle Valves: Full Range of standard, long-stroke and tangential single-seat valves incorporating the standard Tuchenhagen valve features such as :

- > Zero-Maintenance and Reversible Actuators
- > Metal-to-Metal Sealing for longer life
- > Interchangeability of key parts for lower spare parts cost
- > Available in sizes up to 6" OD

Sterile Valve Range: Introducing our new line of long-life bellow valves, the Stericom™ long-life valves

Modulating Valves: Full Range of high-accuracy, highly-sanitary control valves with:

- > Metal or Soft Seal
- > Pneumatic or Electropneumatic positioners
- > Available in Shut-Off or Divert style housing configurations
- > Available in sizes up to 6" OD

And rounding out our wide range of sanitary components are our pressure relief valves type Q ensuring a zero-deadleg piping design on the discharge of PD pumps, inline sampling valves and instrumentation, cleaning devices, sanitary product recovery systems and our new sanitary Expansion compensator for pipeline stress relief in piping systems.

SALES AND SERVICE :

Located in Portland, ME, Tuchenhagen Flow Components has a highly experienced staff ready to answer your technical application questions and queries. We keep an entire inventory of standard shut-off and divert valves as well as spare parts for overnight shipment anywhere in the country.

Our technical support services include application support for all areas of the Dairy plant where our components can be installed, including PMO mixproof application design, valve manifold design and factory prefabrication supply services.

And finally our service engineering department can help you with the staff training, technical on-site troubleshooting and preventive maintenance tasks associated with our components.

Our distributor network of companies offers local support and service on all our components.
