

Evergreen Packaging Equipment

CEDAR RAPIDS, IA, USA – Evergreen Packaging Equipment manufactures a full line of filling equipment for refrigerated dairy, juice and liquid food products. Gable top packaging equipment, which forms, fills and seals paper gable top cartons, is ideal for pasteurized, ESL (Extended Shelf Life), ELL® (Extended Long Life), and hot fill applications. These versatile machines fill cartons from 4 oz. up to half-gallon (150ml up to two liter), at speeds from 30 up to 340 cartons per minute. SPOUT-PAK® twist-off closures also are available for most gable top cartons.

Evergreen's Eco-Pak® system is the most cost-effective filling solution for the school, institutional and single-serve markets. The reliable N-8 fills up to 20,400 cartons per hour. The New servo-driven N-100 packages 4 to 8-ounce (125 to 250ml) cartons at speeds up to 10,200 cph, and 10- to 16-ounce (300 to 500ml) cartons up to 8,500 cph.

Evergreen's New servo-driven Q-35 and Q-70 filling machines are specifically designed for ease-of-operation and accessibility to maximize production efficiencies. The single line Q-35 is capable of filling up to 3,500 quarts/liters and up to 4,500 fractional cartons per minute, while the double line Q-70 fills

up to 7,000 quarts/liters and up to 9,000 fractional cartons per minute. Their infinite fill capability of 6 to 32 oz. (180 to 1150ml) gives manufacturers of low- and high-acid beverages the flexibility needed to bring new products to market quickly and economically.

The EH-3 features a high-hygienic environment that maintains product quality and refrigerated shelf life of ultra-pasteurized product. It forms, fill and seals half-gallon (2 liter) gable top cartons up to 140cpm (8,400cph).

The EQ-5 is capable of forming, filling and sealing US quart gable top cartons at up to 120 per minute, liters at up to 112 per minute and fractional sizes at up to 150 per minute. Two carton sizes can be filled at one time for improved production scheduling.

To ensure that Evergreen machines keep running efficiently, *Run Time™*, a comprehensive parts and service program provides genuine Evergreen parts manufactured to OEM specifications to maximize production, reduce risk of product loss and protect equipment warranties. The company stocks an extensive inventory of critical parts and offers 24/7/365 availability for emergencies. A network of fully-trained, experienced technicians is established to handle any size service request.
