MINT: A COOL CLASSIC

From its ancient Mediterranean roots, mint throughout history has been widely used for its medicinal properties as well for being rich in vitamin A and C and other healthy minerals.

Mint's versatility and popularity is visible through its many uses in foods, beverages and nutraceuticals. From teas and spirits to jelly and candy, it's a consumer favorite because of its fresh taste and association with good health.

Flavorchem partners with some of the most renowned growers of mint and peppermint. Our vendor program ensures we source mints which adhere to our strict standards. As a result, our peppermint and spearmint oils are pure and natural with a smooth crisp, cool flavor profile.

Because our mints are from various regions of the world, they provide a variety of unique flavor profiles that fit almost any application. That is what consumers demand and expect from your products.

Let us show you the Flavorchem advantage!
