

Evergreen Packaging, Inc.

Evergreen Packaging, Inc. manufactures filling equipment for refrigerated dairy, juice and liquid food products. Gable top packaging equipment, which forms, fills and seals paper gable top cartons, is available for pasteurized, ESL (Extended Shelf Life), ELL (Extended Long Life), and hot fill applications. These machines fill cartons from 4 oz. up to half-gallon (150ml up to two liter), at speeds from 30 up to 340 cartons per minute. SPOUT-PAKR twist-off closures are also available for most gable top cartons.

Highly skilled technical staff and genuine Evergreen repair parts support these packaging machines. Gable top materials are available through our global network of converting plants.

A complete line of bottle fillers utilizing various fill systems for liquid foods at speeds from 30 up to 800 bottles per minute

is also available from Evergreen. ESL and ELL options including rinsing, auto sanitization, HEPA, and CIP are also available.

Evergreen cup fillers (ESL, ELL, aseptic) offer format flexibility and speeds up to 60,000 cups per hour in linear and carousel configurations. The company also offers shrink sleeving equipment to finish out your bottling or cup filling line with steam or heat shrink technology.

As a result of a recent merger with Blue Ridge Paper Products, Evergreen Packaging now offers dairies marketing opportunities through the successful MilkRocks! school lunch program.

Who has all the right answers for school and single-serve? **Evergreen, that's who.**

N-8

The N-8 fills up to 20,400 cartons per hour to maximize filling efficiencies in Eco-Pak® gable top cartons. ESL options, including HEPA filtration, self-contained CIP/SIP, and carton treatment, extend shelf life while protecting your product.

The BFCG-32/16 fills up to 400 bottles per minute (8 to 32 oz). Demountable gravity fill nozzles make cleaning easy. ESL options include machine enclosures, HEPA filtration, auto sanitize and CIP. An integrated screw capper completes the package.

BFCG-32/16
