

Norit Südmo

Finding a process partner that successfully blends innovation and sustainability is imperative in the competitive marketplace dairy and liquid food producers face. Products must be on the forefront of innovation to meet consumers' desire for taste, convenience, safety, and variety while processes must be economically and environmentally sustainable. In addition an ever-increasing criterion for consumer choice is how "green" they perceive the product and company to be.

With Südmo North America Inc. as your process partner you have the latest technology from the company that has been providing sustainable processing plant fluid management solutions for more than 50 years. Norit Südmo's extensive range of sanitary and aseptic process valves and the know-how of our multi-disciplined team offers hygienic and aseptic processors the ability to maximize their production time and operational flexibility. In addition to the excellent product quality, a strong focus on service provides for the optimum product life cycle.

Complementing Norit Südmo's process solutions is Norit X-Flow's extensive know-how in wastewater and process water treatment. Norit X-Flow's ultra-filtration membranes for the anaerobic MBR system are a sustainable solution for industrial wastewater. The system produces valuable biogas and high quality water for reuse or discharge.

Innovation and sustainability

Knowing that sustainable and innovative products and services are the key to customer satisfaction, Südmo North America is constantly expanding its offerings with groundbreaking product designs. Recent innovations have provided longer maintenance intervals resulting in reduced plant downtime for aseptic processors, continuous operation for dairy plants, enhanced control technology for flexible process control, and a waste to energy solution for economic and environmental savings.

These are all part of Norit's Clean Process Technologies – world class consumables, components and standardized systems – that play an essential part in helping our valued customers save money and the environment, and meet their water reduction and sustainability goals. Overall, Norit's Clean Process Technologies provide greater process efficiency, longer life-cycles and cost savings, all of which ensure a more sustainable operation.

The Norit Group works continuously on refining our proven technologies, supporting our customers with our know-how, experience, and added-value services in the best possible way. This is why the Norit organization strives to realize a 'best of the best' standard, not just meeting but anticipating and exceeding customers' requirements. We offer unparalleled customer service and technical support for all our products. To help you achieve maximum plant efficiency,

we provide same day delivery service, 24-7 support, maintenance training, and process design review. Visit us anytime at www.sudmona.com to view or download brochures and manuals, or call 815-639-0322. We look forward to helping you save money and the environment and working together towards a sustainable future.
