

Cognis® Nutrition & Health

Cognis® Nutrition & Health...the leading global supplier of naturally sourced ingredients to promote healthy nutrition and well-being. Cognis provides complete solutions and marketing-oriented concepts to help customers meet consumer demands for innovative functional foods. Add value to your products with our marketable health claims and scientifically-proven ingredients.

Experience, expertise and excellence... these are the cornerstones of our success. Cognis understands the consumer marketplace and will work with you to optimize your next new product. Whether formulation assistance, label claim support, or advertising co-promotion, Cognis' customer-focused teams are experts in technical service, science, sales support, and marketing to ensure the success of your products

Cognis Nutrition & Health is a business unit of the Cognis Group which employs over 6,000 people and operates production sites and service centers in 30 countries.

Newtrition™...gives your product a healthy edge

Newtrition™ from Cognis® Nutrition & Health provides the perfect balance of premium quality, naturally-sourced ingredients for your products to meet the hottest trends in the marketplace.

Cognis Nutrition & Health is helping to transform ordinary dairy foods and beverages into new functional wellness foods. Newtrition™ ingredients can help you develop products and position your business for long term growth.

Tonalin® CLA (conjugated linoleic acid), is a great example of the added value of Newtrition™. Tonalin® is the perfect balance for your fat fighting product. Tonalin® CLA helps reduce body fat by up to 10%, while maintaining lean body mass. CLA is a polyunsaturated fatty acid derived from natural safflower oil. CLA is a natural component of many dairy products such as cheese, milk, and

ice cream. Now that healthy diets trend toward low-fat food choices, consumers do not get the CLA their body needs from food alone. To obtain the recommended 3.0 grams of dietary CLA required to achieve its body composition benefits, consumers would have to eat more than 4 gallons of ice cream, 7 pounds of beef or 4 gallons of milk every day.

The Tonalin® range of conjugated linoleic acid products is available in multiple concentration forms to meet a wide range of formulation requirements. Approved dairy applications include:

- Yogurt
- Fermented Milk
- Milk Based Drinks
- Soy Milk
- Fruit Based Drinks
- Meal Replacements

Tonalin® CLA is #1 globally and the world's most researched CLA, with 18 major studies proving its safety and effectiveness. The US Food & Drug Administration has recognized Tonalin® CLA as FDA GRAS. And, since Tonalin® CLA is sourced from natural safflowers, a renewable resource, it is an environmentally responsible choice.

Global Leadership

- #1 CLA brand
- Superior quality
- Broadest CLA portfolio
