

## Stanpac

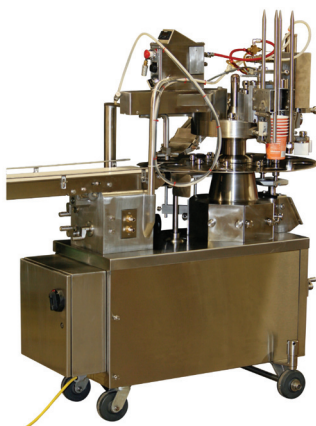

### Good people who make great packaging

Stanpac continues to add new products to its complete packaging line up which allows our customers to differentiate themselves in the marketplace. Spoon 'n Lid novelty packages are now available in several sizes with either a cover all or plug style over cap. The Flex E Fill tm. line of filling equipment easily handles the complete production process of cup dispensing, filling, application of a tab lid, dropping in of either a plastic or wooden spoon and the snapping on an over cap prior to exiting the filler onto the discharge conveyor. When you are finished with your novelty run changeover is easily accomplished and you can run pints, quarts, 48, 56 or 64 ounce scrouds or rounds for the rest of the day. The Flex E Fill tm may be the most flexible filler out there and has been the work horse of the industry for decades.

For more than 60 years, Stanpac's focus has been on Dairy. With locations in Texas and Ontario we are able to serve our customers from coast to coast and beyond. Product safety is job one with the most stringent electronic controls and procedures available to keep your customers safe. Innovation in the area of tamper evidence is one of our strengths with 7 patents in more than 20 countries.

Everything but the Milk – Stanpac is rooted in dairy. Way back in the early years Stanpac manufactured closures for dairies bottling milk in glass bottles. Today we continue in that great tradition by providing dairies and processors glass refillable milk bottles, closures, crates and carriers. We are proud supporters of the International Home Delivery Association

A network of service technicians throughout the country assist our customers with new projects, startups and preventive maintenance programs. Our

sales associates are there to help you achieve your goals. We want to be your first choice for packaging.

Stanpac is large enough to handle your big projects and small enough to handle them in a fast efficient manner. Some say that we are not number one. We agree. You are!
