

Norit Südmo

More than ever, dairy and liquid food producers are seeking to combine sustainability and economic value by doing 'more with less'. With Norit Südmo as your process partner, you can have a competitive product from a CAPEX standpoint with the benefit of the lowest total cost of ownership. Norit Südmo's extensive range of sanitary and aseptic process valves combined with the expertise of our team offer hygienic and aseptic processors the ability to maximize their production time and operational flexibility. In addition, a strong focus on service provides for the optimum product life cycle.

Innovative Products

Norit Südmo's proven products lead from a technology point of view. A few advantages of our mix proof valves include:

- Robust body provides roundness to protect seal life
- Clear protection of cross-contamination with deflector technology
- Most intelligent and robust control top technology

Efficient Performance Technology

Norit's Efficient Performance Technology mark of excellence, for its top performing products, incorporates one of the key principles of sustainability 'do more with less'. This philosophy applies to product innovations and solutions that offer measurably higher performance and efficiency against competitive pricing. Our recently launched IntelliTop® 2.0 control unit carries this mark of excellence, and is a prime example of this principle put into action.

Norit's Efficient Performance Technology continuously challenges us to seek solutions that provide the optimal processes for your dairy or liquid food plant.

Life Cycle Costs

Initial capital cost is, in most instances, a fraction of the whole life cost of a typical valve installation. Downtime with loss of productivity and replacement of short life expectancy consumable parts, such as seals, make up a large portion of the total life cycle cost. Norit Südmo's valves provide more plant efficiency and longer running times. By reducing product

losses, chemical usage, and maintenance materials and labor, Norit Südmo helps our customers meet their long-term financial sustainability goals.

Norit Südmo's past performance proves the most cost-effective valve system option in the long run. Do not waste a day. Partner with Norit Südmo, the supplier who assures that you will dramatically reduce your valve total cost of ownership and give you an advantage over your competitors.

Call us anytime at 815-639-0322, or go to www.sudmona.com to view or download brochures and manuals. We look forward to helping you 'do more with less'.
