

Union Pacific

Union Pacific Delivers Door-to-Door Logistics Expertise

Every day, customers in every industry take advantage of Union Pacific's logistics expertise. Union Pacific coordinates the efficiency of America's rail network with the flexibility of trucks and the reach of ocean carriers to provide door-to-door freight transportation solutions. No matter what customers ship, or where they need to ship, Union Pacific gets it there.

With logistics expertise and coordination that come with managing a fleet of more than 8,000 locomotives and 200,000 rail cars, Union Pacific makes it easy for customers to navigate complex logistics processes. Through on-time freight transport from a variety of locations -- whether near rail or not -- Union Pacific helps customers manage tighter inventories to meet growing business demands.

No Rail, No Problem

Through its Union Pacific Distribution Services subsidiary, Union Pacific logistics experts have experience in practically every industry including automobiles, chemicals, energy, agriculture, met-

als, minerals, forest products, consumer goods and more.

Union Pacific's new-customer onboarding team helps customers determine which services best meet their transportation needs. The company offers

new customers a unique "white glove" service for the first 90 days to ensure a seamless transition of their business to Union Pacific.

From initial introduction through the first shipment, the onboarding team acts as a single point of contact, easing the process of becoming a Union Pacific customer -- from credit application, to shipment,

invoicing and every-thing in between. In essence, the onboarding team represents a new-customer welcoming committee.

Fuel-Efficient and Environmentally Responsible Freight Transportation

Shipping by rail is the most fuel efficient and environmentally responsible mode of ground freight transportation.

- Union Pacific can move one ton of freight 480 miles per gallon of fuel. That's like your car getting more than 250 miles to the gallon.
- Rail is almost four times more fuel efficient than truck, according to the U.S. EPA.
- Freight trains generate a carbon footprint that is an average of 75 percent less than trucks.
- Union Pacific owns America's cleanest Class I locomotive fleet.

BUILDING AMERICA®

Moving millions of pounds of dairy products efficiently from the West Coast to the East and everywhere in between is no small task. It takes the largest fleet of refrigerated rail cars in America, moving in expedited lanes across a synchronized, multi-modal transportation network. It takes Union Pacific. Find out more at UnionPacific.com or call (800) 877-0513.

Wherever you find business, you'll find us.
