

Urschel Laboratories, Inc.

Urschel Introduces New Grating Heads for the Models CC, CC-D, CC-DL, and CCX-D

Through new Urschel engineering developments, Urschel now offers a wide variety of grating heads that offer cuts from coarse granules to different types of shreds. Grating heads present added flexibility to slicer/shredder Models CC, CC-D, CC-DL, and CCX-D.

Grating heads incorporate a simple design of four posts with corresponding fasteners, upper support ring, locking lower support ring, and a grating screen. A multitude of interchangeable grating screens are available to easily switch from one style to another. Applications include cheese, coconut, nuts, and carrots.

“The Model CC series of machines continues to grow. We offer several different types of CC slicer/shredders to suit different applications. New grating head options significantly increase existing cutting capabilities,” stated Tim O’Brien, vice president of sales at Urschel.

Urschel offers complete Product Test Cutting Facilities throughout the world. Product Test Cutting Facilities feature extensive, complete analysis by experienced technicians to determine the best Urschel machine suited for each application, and assist customers in discovering additional cutting options.
