ALLPLEX FMG US Series

Multi-purpose food grade grease

ALLPLEX FMG US Series

Specifically designed for use in applications where incidental food contact is a possibility. The aluminum complex thickener system allows for excellent water resistance and a broad temperature range. ALLPLEX has a special additive package that provides excellent anti-wear and extreme pressure protection from corrosion. The grease also provides for improved equipment and component life in a washdown environment.

Available packaging

- Drums
- Kegs
- Pails
- Standard grease cartridges
- Single-point lubricators

Benefits of using ALLPLEX FMG US

Benefits	Results
NSF H1	Promotes food safety
Semi Synthetic	Improved lubricant life
Aluminum Complex Thickener	Water resistance
Additive Package	Decreased wear and corrosion protection

MILLPLEX FMG 2 US

Multi-purpose food grade grease for highly loaded applications

MILLPLEX FMG 2 US

Specifically designed for highly loaded bearings in the food and pharmaceutical industries. The calcium complex thickener system allows for excellent load carrying capacity and corrosion resistance. The highly refined base oil and thickener system combine to increase stability at high temperatures.

Benefits of using MILLPLEX FMG 2 US

Benefits	Results
NSF H1	Promotes food safety
Fully Synthetic	Improved lubricant life at high temperatures
Calcium Complex Thickener	Improved load characteristics
Additive Package	Decreased wear and corrosion protection

Available packaging

- Drums
- Kegs
- Pails
- Standard grease cartridges
- Single-point lubricators
