

Supplier Capabilities Spotlight

Fortress Technology Inc.

Fortress Technology is a leader in Metal Detection Manufacturing that, since its inception in 1996, custom manufactures their equipment to suit their customers' needs, application and specifications to ensure optimal metal detection, without an exorbitant price tag. A global company; Fortress provides distribution, service and support worldwide.

The Next Evolution in Metal Detection

At a lower cost of ownership than x-ray, the new Interceptor metal detector with a simultaneous multi-frequency system provides a cost effective alternative for food safety programs. Processing the transmission and reception of multiple frequencies over a broad spectrum, the Interceptor is ideal when inspecting traditionally difficult products.

Never Obsolete: Fortress Detectors Are Always Supported

Fortress metal detectors have always been

engineered with a Never Obsolete Commitment. Their customers have peace of mind that a Fortress metal detector will always be supported with parts, software upgrades and a global service team for the life of the detector. Stay up to date without having to purchase a new detector.

Their latest technology can quickly and economically be field installed in a detector built over 18 years ago, ensuring their customers stay up to date with food safety

initiatives without having to purchase a new detector.

Not sure if you're getting the most out of your metal detection system?
