

# BIOENERGY RIBOSE®

## What is Bioenergy Ribose®?

Bioenergy Ribose is a unique 5-carbon carbohydrate that simulates the body's natural energy production. It is the backbone of our ATP structure, making it essential to the production of cellular energy. Ribose drives the process that replenishes ATP and other energy components so having sufficient levels of Ribose in your cells is crucial.

Ribose is naturally present in every living cell in the body but the process to produce it is very slow, especially in the heart and muscle tissues. This makes supplementing with Bioenergy Ribose vital to keeping your energy levels steady and sustainable.

With this sustainable energy source, you experience greater endurance, enhanced physical performance, reduced muscle soreness, cramping and stiffness, increased muscle mass, improved heart function, and better metabolism — you become a healthier you.

# Increased Energy.

***Endurance.  
Performance.  
A Healthier You.***

## Energy Production and Sustainability

### Energy Enhancement

- Increases overall energy
- Delivers a sustainable energy boost that lasts all day, with no crash

### Cellular Energy Source

- Supports the natural production of energy
- Provides a supply of intracellular energy components
- Enhances recovery of nucleotides (energy molecules)

## Physical and Athletic Performance

### Physical Performance

- Improves physical/athletic performance
- Increases tolerance to exercise
- Increases muscle mass

### Greater Endurance

- Improves endurance
- Increases metabolic efficiency, which leads to enhanced performance

### Reduces Cramping and Soreness

- Improves muscle recovery and decreases cramping
- Decreases DOMS (delayed onset of muscle soreness)

BIOENERGY  
**RIBOSE**®

## Cardiovascular Health

### Heart Health and Protection

- Improves heart function, especially for subjects with reduced cardiovascular function
- Provides energetic platform for healthy cardiovascular metabolic production
- Improves the ischemic threshold
- Enhances diastolic function

## Alleviated Mountain Sickness

- Alleviates or prevents acute mountain sickness symptoms (headache, nausea, lethargy and pulmonary edema)

## Weight Management and Healthy Body Composition

- Supports exercise metabolism for longer, more intense workouts
- Reduces body fat
- Regulates the body's use and production of energy
- Helps build lean muscle

### Reduces Blood Sugar

- Functions as a negative glycemic sugar and is suitable for diabetics with no insulin spikes or elevation of blood glucose levels

## About Bioenergy Life Science, Inc. (BLS)

The mission of BLS is to create innovative ingredients for healthier living. We are best known for the only patented & FDA GRAS-certified D-Ribose: Bioenergy Ribose®. We use that success and our expertise to develop new scientific based, multi-functional ingredients. Applications include food & beverage, supplements, and sports nutrition that support energy, digestive health, weight management, anti-aging, heart health and many other health-enhancing benefits.

These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure or prevent any disease.
